

A man with glasses and a goatee, wearing a green lab coat over a plaid shirt, is smiling and holding several oranges. The background is white. A red horizontal band is overlaid across the middle of the image, containing white text.

*The Topper Touch* -  
Service plus...for our food processing and  
grocery customers!

# The *Topper Touch* – Service plus...for our food processing and grocery customers!

Over the years, Topper has built a reputation for quality, service and reliability by investing time and dedicated effort to understanding our customers' business. And we've done it one customer at a time. We've translated that knowledge into developing a portfolio of customer-driven services that add unique value to our complete range of textile rental services. These programs have been designed with one objective – to simplify management of your textile rental needs. And our first priority is exceeding service expectations. That's the *Topper Touch*.

We know the food processing and grocery industries – your need for clean and hygienic, sturdy and durable uniforms that protect your staff and the food products they work with. We also know you need a cost-effective solution. So we've tailored our service offerings to your business:

- Clean and hygienic, freshly pressed uniforms and aprons
- High standards for product inspection and repair
- Routine replacement policy
- Range of mats to prevent fatigue, control dust, and improve workplace safety
- Flexible pick-up and delivery schedules
- Option to purchase the same high-quality uniforms we rent.

And no textile rental company offers a complete service without providing a range of storage solutions. Topper provides lockers to enhance security and inventory control, garment racks to organize inventory conveniently and bag stands to improve workplace cleanliness.

At Topper, we work with you to design an individualized package of products and services that exactly meets your needs. And that's why the *Topper Touch* wins us more satisfied customers – one customer at a time.
